FACIAL TREATMENTS

All facials are individually tailored to your skin type following a consultation. In most cases, we use microdermabrasion. With microdermabrasion, a mechanical peeling method, the stratum corneum of the skin is removed, new cell formation is stimulated and active substances applied afterwards can be better absorbed by the skin. Microdermabrasion is very effective against wrinkle formation, various signs of ageing and many skin problems. We look forward to having a chat with you.
